Dear Colleague:

The American College of Foot & Ankle Orthopedics & Medicine is extremely pleased to introduce our new two-day in-depth coding seminar series and "Exam Preparation Course." McVey Associates, Inc is proud to offer this seminar designed as a more complete educational course and a preparatory course for the FACFAOM/PAHCS certification program for podiatry coders. It will be presented in many locations around the country, as you can see from the attached flyer.

This two-day workshop is continuously updated to provide the most comprehensive and current coding information for Podiatry practices including:

- ▶ Documentation guidelines for Evaluation and Management services;
- ▶ Application of the most current version of Medicare's Correct Coding Initiative
- ▶ ABN/Waiver Medical necessity; and
- ▶ Other emerging coding and reimbursement issues.

The workshop will be followed by the administration of the certification exam by PAHCS for those interested in becoming a Certified Podiatry Coding Specialist. The workshop also provides a strong foundation for podiatry coding even for those not interested in certification.

Michael Warshaw, DPM, CPODCS will be your seminar leader. His extensive experience in podiatry coding and billing and unique teaching style will greatly enhance your understanding of Podiatry coding.

The American College of Foot & Ankle Orthopedics & Medicine is working hard to support Podiatrists' practice management needs, particularly in the areas of coding and reimbursement. I encourage you to support your coding staff to attend this worthwhile program.

Sincerely,

Beth D. Jarrett, DPM, FACFAOM  
President
