**HANDLE SPECIAL CARDIOLOGY SITUATIONS**

- \* Is a patient responding to Medication? T-Codes to define compliance and non-compliance.
- \* Real patient examples to reflect accurate coding for 2021 update.
- \* Cardiology specific examples will be discussed.
- \* The 2022 code set adds 14 codes to Chapter 18, signs and symptoms. Many coders have probably memorized R05 Cough, but R05 is not reportable code in the 2022 code set. Instead, use one of the six new codes, which provide added specificity to cough. More to come.
- \* The 2022 code set does add one code to Chapter 9: I5A Non-ischemic myocardial injury (non-traumatic) with directions on code usage.
- \* The remainder of the 2022 updates to Chapter 9 for Cardiology involve additions and modifications to excludes 1/2 and Code first notes. We will cover them all.
